SUMMARY

Full-Stack Developer with a product mindset and experience shipping production web applications used by real teams. Comfortable owning work across frontend, backend, and data, and effective in fast-moving, remote-first teams where ownership and execution matter.

SKILLS

- **Languages:** JavaScript, TypeScript, Go, Python, C++, C, HTML, CSS
- **Frontend:** React, Next.js, Tailwind CSS, Shadcn, Recoil, WebSocket, React Flow
- **Backend & Data:** Node.js, Express.js, Hono, MongoDB, PostgreSQL, Prisma, Drizzle, Redis, Pinecone, NextAuth, Better-auth
- **AI, DevOps & Tools:** Langchain, Hugging Face, Playwright, Browserless, Docker, Azure, Postman, Git, GitHub

EXPERIENCE

- **Enrich Labs (Sendkit)** Remote
Full-Stack Developer October 2025 – Present
 - Build integrations for Sendkit, a cold email platform for agencies and GTM teams, letting users connect and operate their existing tools seamlessly within the product.
 - Developed migration modules enabling customers to import data from other sequencers with minimal friction, removing a major barrier to switching platforms.
 - Translate customer feedback into concrete product improvements and work directly with customers to debug issues and resolve bugs.
- **Linkbird** Remote
Full-Stack Developer January 2025 – October 2025
 - Led development from concept to a working product, fully remote: a LinkedIn automation platform for mass outreach built for GTM agencies, with workflows to manage many accounts and campaigns from a single dashboard.
 - Built the outreach automation engine to run LinkedIn campaigns at scale, including bulk connection requests, personalized messaging, and automated follow-up sequences using Playwright and the Page Object Model.
 - Engineered reliable browser automation that keeps session and identity consistent per account under sustained, high-volume use.

PROJECTS

- **SketchSync: [Real-Time Collaborative Whiteboard App]** December 2024
Tools: [React, TypeScript, Node.js, WebSockets, Tailwind CSS, Git, GitHub] [GH](#) [in](#)
 - Built a collaborative whiteboard app that enables real-time drawing and editing, facilitating teamwork and brainstorming sessions.
 - Implemented WebSocket-based communication for seamless live updates across multiple users.
- **Rezumi: [AI-Powered Resume Builder]** July 2025
Tools: [Next.js 15, TypeScript, Tailwind CSS, Google Gemini AI, Drizzle ORM, PostgreSQL, Git, GitHub] [GH](#) [in](#)
 - Built an AI-powered resume builder that tailors resumes to job descriptions using Google Gemini for intelligent text generation.
 - Developed job description parsers and skill extractors to structure resume content optimized for ATS (Applicant Tracking Systems).
- **PDF-Talk: [AI-Powered PDF Question-Answering Tool]** October 2024
Tools: [Next.js, TypeScript, NextAuth, Pinecone, Hugging Face (deepset/roberta-base-squad2), Node.js, Git, GitHub] [GH](#) [in](#)
 - Developed an AI-powered tool enabling users to upload PDFs and ask questions about the content, significantly improving document accessibility and interaction.
 - Leveraged Hugging Face's deepset/roberta-base-squad2 model to provide concise, context-aware answers, delivering fast and accurate responses.
- **NotionLeager: [Telegram Expense Tracker with Notion Backend]** 2025
Tools: [Go, Notion API, Telegram Bot API, Git, GitHub] [GH](#) [in](#)
 - Built a Telegram bot in Go for personal expense tracking, using Notion as the database backend through its API.
 - Designed command-based workflows to log and query expenses directly from chat.
- **Spotify Playlist to YouTube Playlist Converter: [Integrating Spotify and YouTube APIs]** August 2024
Tools: [JavaScript, Node.js, React, Express.js, Spotify API, YouTube Data API, Git, GitHub] [GH](#) [in](#)
 - Developed a full-stack app automating Spotify-to-YouTube playlist conversion.
 - Achieved a 95% success rate in track matching and reduced manual effort by 90%.

EDUCATION

- **Guru Teg Bhadur Institute of Technology** Delhi, India
B.Tech, Information Technology
 - CGPA: 8.24/10
